
Hearts in windows

Some houses in BC have hearts in the windows.

Why are the hearts in the windows?

Many people are worried about COVID-19.

Most people stay at home. They want to stop the virus.

Some people still need to go to work.

Doctors, nurses, policemen, and grocery store workers go to work every day.

Thank you!

People want to thank the workers.

They put hearts in their windows to say, "thank you!"

This house has a heart in its window.
