
Flu shots during COVID-19 📖

Are you planning to get a flu shot at a pharmacy? Things will be different this year.

“Pharmacists will be putting in more time and resources to keep patients and themselves safe during COVID-19,” said Geraldine Vance. Vance is the CEO of the BC Pharmacy Association.

1. You will need to make an appointment. Pharmacies will not hold clinics. Many will not let you just walk in.
2. You will be checked for symptoms of COVID-19. Do not visit a pharmacy if you have a fever or a cough.
