
Build a snow person

Build a snow person this winter for outdoor family fun!

What you need:

- mittens or gloves
- snow, not too wet or too dry
- outdoor space
- buttons or stones, sticks, a carrot

What you do:

1. Make a large snowball.
2. Roll it on the ground to pick up more snow.
3. Pack snow around the bottom of your large snowball to stop it from rolling.
4. Make a medium snowball for the body.
5. Lift it onto the large snowball. Use more snow to stick the two snowballs together.
6. Make a small snowball for the head.
7. Lift the head onto the body. Use more snow to stick the head to the body.
8. Add eyes, a nose and a mouth to the face. Use buttons or stones and a carrot. You can even add stick arms, a hat and a scarf!
