## Ways to help the Earth

---

Earth Day is April 22. It is a special day to care for our planet.

Here are some things you can do to help the Earth on Earth Day and every day.

Pick up trash. Take a garbage bag and help clean the park or beach.

Plant something. Plants help clean the air.

Save energy. Turn off things when you are not using them.

Put waste in the right place. Use trash cans for garbage. Use recycling bins for paper, plastic and glass.
